Warehouse receipts system legal framework: best practices to enable structured trade

Dr. Augustine Langyintuo

Finance, Competitiveness and Innovation (FCI) World Bank Group - Nairobi, Kenya

Presented at the Commodities Exchange & Warehouse Receipt Regulations Sensitization Forum at Alisa Hotel, Accra, Ghana on 12 July 2018

Challenges of promoting structured trade in Africa

Customs procedures

Trade policy uncertainty

Home country trade policies

Export finance and risk mitigation issues

Trade restrictions on imported commodities

Role of international trade agreements / regional treaties

Challenges

Public sector roles in promoting structured trade

Enabling role

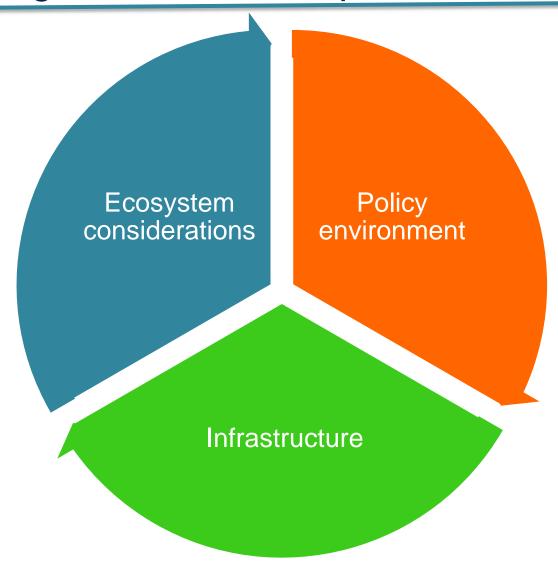

- •Providing an external legal environment that is predictable, accessible, enforceable and fair
- •Where required, driving the development of physical infrastructure without which market actors cannot properly function (e.g. regulatory agencies, warehousing, transportation, telecommunications, information networks, etc.)

Oversight role

- Underpin exchanges in their self-regulatory capacity to:
- Discipline those who try to manipulate the markets for their own benefit
- ♦ Protect market participants from the unscrupulous practices of others
- Underpin system integrity and stability

Creating an enabling environment to promote structured trade

Market infrastructure to address to promote structured trade

⊕ No securely-defined ਰੋਂ trade flows, and an .⊆ assured To market, e leading to be limited **a** stimulus for infrastructur investment

ਰ Trade has 등 been mainly with ਨੂੰ the industrialize £ d world, and now [®] increasingly ्ष with Asia, but not .[⊕] across .≦ borders (only 11%)

used by E Africa's competitors to finance, ्र add value o to and ਲੋਂ manage the E risks associated .≥ with commodity ŏ trade, are significantly under-used by Africans

型 a long way ਕ away, and there are တ္တိ many g barriers ∞ deterring ♀ Africans ≒ from accessing them

and Europe determine the price for σ the ₹ commoditie g s that g contribute ₹ ~90% of total annual exports

Ecosystem considerations

- Friendly tax regimes
- Assurance of non-discriminatory access to markets
- Non-interference with the functioning of the markets
- Non-discrimination amongst investors
- Honoring of internationally accepted standards
- Abiding by contractual undertakings
- Ensuring sector is kept free of corruption

Logical structure of the legal framework

Policy

 Defines the government's objectives & institutional structure for the sector and mechanisms to achieve the objectives

Law

Implements
 the policy by
 providing
 legally
 binding
 enforcement

Regulations

 Set of rules to operationaliz e the law

The purpose of regulation (in line with IOSCO)

Market integrity

- Market rules and procedures should be enforced in a manner that is fair, efficient and transparent
- Market structures should not unduly favor some market users over others
- Regulation should detect, deter and penalize market manipulation

Reduction of systemic risks

- Regulation should aim to reduce the risk of default by market actors or intermediaries
- Where default occurs, regulation should seek to reduce the impact of that failure across the system as a whole through effective and legally secure arrangements for default handling

Investor protection

 Investors should be protected from misleading, manipulative or fraudulent practices, including insider trading, front running or trading ahead of customers, and the misuse of client assets

Components of the regulations

Securities functions

- Provides the statutory basis for the regulatory agency, its powers, accountability and governance norms, etc
- Sets out the framework for licensing of market participants
- Specifies provisions for delegating powers to self-regulatory organizations (SROs)
- Provides scope for oversight, investigation and sanctioning of market participants

Fiduciary Provisions

- Ensures adequate safekeeping of deposited funds, margins, collaterals & accruals
- Ensures segregation of client funds separately from broker's proprietary funds
- Ensures intermediaries make all required disclosures to clients
- Prevents abuses of fiduciary position (e.g. front-running, bucket-shopping

Banking / Payments System Law

- Ensures that the accredited clearing banks can effectively perform their function
- Provides due recognition and treatment of appropriate forms of margin collateral
- Sets out prudential requirements to ensure risk-adjusted capital adequacy

Commercial function

 Provides for the sanctity of contracts, including their enforceability through the legal system

Components of regulations (Cont.)

Insolvency function

- Exempts insolvent parties' assets held by clearinghouse margin collateral and guarantee fund contributions from being frozen or seized by parties other than the clearinghouse (i.e. administrators, liquidators)
- Allows positions to be transferred from insolvents to other parties

Financial intelligence and anti-money-laundering

- Provides robust protection against use of markets for financing of crime/terrorism or money-laundering, including upholding compliance with Know Your Customer principles
- Provides certainty to market participants about the application of such rules
- · Avoids unnecessary impediments to market functioning

Taxation

- Does not unreasonably inhibit market development and functioning (i.e. funds transfers, international flows, deliveries, etc)
- Applies appropriate, product/participant-neutral tax treatment

International Provisions

- Provides certainty of treatment for cross-border flows of commodity, capital and currency
- Non-discrimination between domestic and international market users
- Provides for information-sharing and other forms of collaboration between regulators in different jurisdictions

Strengthening WRS Legal Reforms in Ghana: Role of the Ghana WRS Project

Ghana WRS Project objectives

- Build the capacity of WRS regulatory authorities and market participants (i.e., GGC and other private sector players).
- To improve smallholder farmers' access to finance to boost productivity, production and improved farm performance.
- To improve the functioning of agricultural commodities markets through improved risk management, increased transparency and improved information
- To improve farmer livelihoods through transparent price discovery, and improved market access by encouraging competition along the agricultural value chain

Project Description – Project components

Strengthening the WRS regulatory Framework

• Reform the existing legal framework to include electronic warehouse receipts, negotiable receipts and management of leased warehouses

Pre/post awareness on regulations enactment

 Build awareness for parliamentary committees and key stakeholders on the legal and regulatory requirements of all players

TA to Strengthen the Warehouse Receipt System

• Support the WRS regulatory authority in warehouse licensing, inspection, surveillance, supervision, standardization, grading, regulations, grading, rules, etc.

Stakeholder Training and Capacity Building

 Build capacity and train key stakeholders on the cost and benefits of WRS and structured commodity trading.

Warehouse Management and WRS IT Software System

 Deploy an electronic warehouse receipt system (eWRS) that supports negotiable instruments and a secured electronic product tracking platform.

Expected Development Results

Farmer level

- Improved access to finance for farmers and SMEs and enhanced linkage by small farmers and traders with markets
- Increased market power of small-holders by enabling them to choose the time to sell their crops at competitive prices

Agriculture and economy wide levels

- Improved agricultural infrastructure through investments in transport, warehouses and storage, market information
- Smoothened market prices by facilitating sales throughout the year at lower transaction costs by guaranteeing grain quantity/quality
- Improved functioning of agricultural commodities markets through better risk management, transparency & enhanced information flow
- Strengthened ancillary businesses such as transport, storage, logistics, inventory management,
 MIS, standards, training and certification

Thank you
